**A Botanical Waltz Across Texas:
Biological Crossroads and Floral Wonders of the Lone Star State**

Presented by:
Barney Lipscomb
&
Jason Singhurst

Tuesday - June 27, 2017
11:00 am - 12:00 pm

Barney Lipscomb, a botanist, editor, public speaker, and researcher who began his career at Southern Methodist University in Dallas, Texas, in 1975 and is now the Leonhardt Chair of Texas Botany and director of BRIT Press at the Botanical Research Institute of Texas, Fort Worth. His research interests include the flora of Texas, taxonomy of the Cyperaceae, poisonous plants, the application of botany to forensic science, and natural history art as it relates to science. He has co-authored three books and authored or co-authored over 30 scientific papers.

Jason Singhurst, a botanist and plant ecologist at Texas Parks and Wildlife Department, manages GIS and remote sensing land cover classification projects and conducts status surveys of rare plants in Texas. He is the discoverer of numerous Texas plants, published over 100 scientific publications, and is a co-author of *Rare Plants of Texas* (2008).
